## Shiselweni Home Based Care – Mission4Swaziland supported by Mission 4x4

Posted on **08/08/2012** by [Elzaan](#)

Mission 4x4 supports Dr Arnau van Wyngaardt, who heads up Shiselweni Home Based Care, through the GPS Mapping Project.

During June, people from several congregations teamed together with one mission: Use their love for the outdoors in God's Kingdom by supporting SHBC.

We have been supporting Arnau on a number of occasions. Our aim is to assist them in plotting the coordinates of the homesteads of each caregiver onto a map, with the use of a GPS. This helps with strategic planning to determine in which areas they should consider expanding their work in order to be more effective.

"For the people visiting us, all of whom are 4x4 enthusiasts, the day in the field was an adventure as they had to negotiate treacherous tracks to reach some of the homesteads. After an enjoyable day, I was able to compile a map of all the homesteads which we have plotted up to now and I was filled with gratitude to see a graphic image of what SHBC is accomplishing.", says Arnau.

Our next outreach will be in September 2012. Visit [www.mission4x4.co.za](http://www.mission4x4.co.za) for more details or to join.
